Pathway Name: Network Automation Specialist

Overview:

A Network Automation Specialist plays a crucial role in today's digital landscape. With increasing complexity of network infrastructure, their knowledge in automating and streamlining network operations is essential to designing, implementing, and maintaining automated systems. They improve efficiency, reduce errors, and enhance overall performance. Their skills in scripting, programming, and network protocols enable them to optimize workflows, deploy changes rapidly, and troubleshoot issues swiftly, empowering organizations to scale, adapt to evolving technology, and ensure seamless connectivity.

Pathway Requirements: Certifications Required: 3 out of 3(Python, Software Development, Cisco Certified Support Technician – Networking)

Industry Job Type/Estimated Starting Salary

Network Automation Associate = $65,000

Network Automation Specialist = $60,000

Python Developer = $80,000

Software Developer = $70,000

Pathway Name: Network Security Support Technician

Overview:

Network Security Support Technicians play an important role in protecting the integrity of computer networks. In today's digitally connected world, where cyber threats are constantly evolving, their expertise is vital. They are responsible for monitoring and analyzing network traffic, detecting and mitigating potential security breaches, and implementing robust security measures, by proactively identifying vulnerabilities, troubleshooting issues, and providing timely support. They safeguard sensitive data, prevent unauthorized access, and maintain the overall stability of networks.

Pathway Requirements: Certifications Required: 2 out of 2(Cisco Certified Support Technician – Cybersecurity, Cisco Certified Support Technician – Networking)

Industry Job Type/Estimated Starting Salary

Computer Support Technician = $42,000

Cybersecurity Consultant = $65,000

IT Support Technician = $37,000

Network Security Analyst = $61,000

Pathway Name: Network Support Freelancer

Overview:

A Network Support Freelancer is their own boss. Businesses rely heavily on networks for their operations and a freelancer with network support skills can help computer networks run properly, troubleshoot issues, and provide timely solutions for businesses of all sizes. Their ability to configure routers, maintain security protocols, and optimize network performance helps organizations stay productive and secure. Moreover, freelancers bring flexibility and cost-effectiveness, as they can be hired on-demand for specific projects or ongoing support. Their

expertise ensures minimal downtime, improves productivity, and enables businesses to focus on their core competencies.

Pathway Requirements: Step 1 Required: 3 out of 3 (Cisco Certified Support Technician – Networking, ESB - Entrepreneurship and Small Business, Design for Delight Innovator)

Step 2 Required: 1 out of 2 (QuickBooks Desktop, QuickBooks Online)

Industry Job Type/Estimated Starting Salary

Information Technology Network Support = $45,000

Network and Service Support = $48,000

Network Infrastructure Consultant = $66,000

Network Support Freelancer = $55,000

Pathway Name: Office Manager / Administrator

Overview:

Office managers have the challenging task of ensuring things keep running smoothly, regardless of what obstacles get in their way. So how do you convince a company that you have what it takes? Validate your support, administrative, and management skills by earning the Office Manager credential from Certiport. From managing databases to creating important procedural documents, tracking with spreadsheets, and delivering professional presentations, the Office Manager Pathway credential is the best way to prove you have the skills to keep an office running smoothly.
